

Anyone can publish online

What is Edublogs?

Edublogs allows teachers, students, and anyone involved in education to **publish online** using a customized version of **WordPress**.

It's **safe, authentic, and supported**.

What is WordPress?

WordPress is a powerful and dynamic content management system that's behind over **one-third of the whole web**. It's the most popular way to create blogs, websites, and other sorts of online spaces.

Why use Edublogs?

- **Safety** is prioritized. Edublogs is **ad-free** and you can choose the **privacy** settings that suit you.
- Your online space is **highly customizable**. Turn it into a blog, a website, a resource archive, a portfolio etc.
- Publish for an **authentic audience** if you wish.
- 24/7 email **support** for all.
- Integrate the work you're doing online and offline: **text, videos, audio, images, web tools, documents** and more.
- Teachers can set up, manage, and moderate student sites using exclusive **My Class** tools.
- Create as many sites as you need for **free**.

Frequently Asked Questions

Is Edublogs free?

Yes! You'll have full privacy options, access to hundreds of themes, 24/7 support and more. Upgrade to Edublogs Pro for a few additional features <http://edublogs.org/features>

Who can use Edublogs

Teachers, students, or anyone involved in education.

How do I get an Edublogs site?

Simply go to <http://edublogs.org> and click on 'Get A Free Blog'. Teachers can create student blogs from their dashboard or ask students to create their own sites.

How do I learn more about blogging and publishing online?

Check out our range of free, self-paced courses for teachers and students at <https://teacherchallenge.edublogs.org>

We also host a supported Student Blogging Challenge every March and October <https://studentchallenge.edublogs.org>

Can I have a dedicated Edublogs network for my entire school, district, or university?

Absolutely! Our sister service, CampusPress, is well known for reliable WordPress hosting. Check out <https://campuspress.com>
